

# Data Cleaning & Preparation

## Objective

Prepare the e-commerce dataset for analysis by identifying and resolving data quality issues.

## Cleaning Activities Performed

- Standardized column headers.
- Corrected date formats to YYYY-MM-DD.
- Checked for duplicate Order IDs.
- Replaced missing CouponCode values with "Nil".
- Standardized TotalPrice formatting to two decimal places.
- Reviewed dataset for consistency and completeness.

## Data Quality Validation

- No duplicate Order IDs detected.
- Dates standardized.
- Missing CouponCode values addressed.
- Numeric fields validated.

## Outcome

The dataset is now clean, consistent, and analysis-ready for future reporting and visualization.
